

TRUedx™

TRUBIQUITY

End-to-end management of electronic data interchange and supply chain integration.

ARE YOU LOOKING TO:

- ▶ Gain the competitive advantages of EDI without investing in additional hardware, software and resources?
- ▶ Reduce reliance on outdated, cumbersome in-house EDI systems and processes?
- ▶ Trade data with customers, suppliers and partners across different time zones and geographies?
- ▶ Share the data stored in enterprise applications with partners throughout the supply chain?
- ▶ Ensure seamless and secure compliance with trading partner specifications?

Providing outsourced EDI for cost savings and efficiency.

To stay competitive in today's global marketplace, companies across all industries seek ways to reduce costs, increase efficiency, and drive bottom-line results. In this endeavor, companies are confronted with the challenge of building and maintaining a cost efficient data exchange infrastructure to meet the increasing demand for EDI throughout their supply chain. As EDI requirements continuously change and grow, companies struggle to obtain and retain compliance with the imposed mandates. In the past, a company's only option was to procure and maintain a complex network of communication portals, translation/mapping software and integration methodologies – sometimes across multiple platforms.

Allowing you to focus on what matters most.

Recognized as a premier provider of EDI solutions in the global marketplace, Trubiquity has leveraged more than two decades of EDI experience and industry knowledge in key sectors into a complete outsourced solution, TRUedx. TRUedx simplifies EDI and maximizes a company's ROI

through rapid automation and seamless integration across myriad platforms, industries and marketplaces around the world. Trubiquity's TRUedx solution was built on the sole idea that no matter the size or budget of a company, EDI should be a competitive advantage, not a resource and system burden.

No Annual Maintenance Fees – Companies that use “traditional” translators are typically charged annual maintenance fees ranging from 15 to 35 percent of software cost.

No Software to Buy or Support – Our solution is a software as a service, delivering data to your doorstep in the format you require. (SNF, IDOC, etc.).

Eliminate Traditional VAN Charges – TRUedx is the communication provider. No more variable KC charges, mailbox charges, or interconnect charges!

Focus on Your Core Business – TRUedx eliminates daily EDI “communication issues,” “mapping issues,” and “translation and compliance issues,” allowing your staff to focus on the “mission critical” issues.

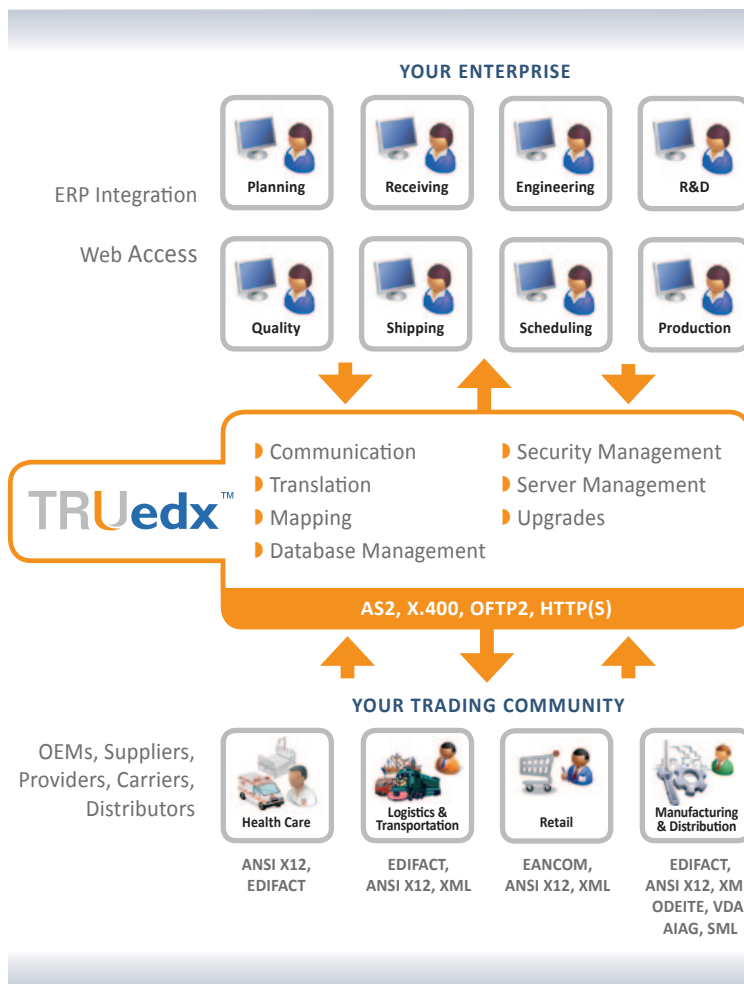

TRUedx™

TRUBIQUITY

Offering unmatched EDI capabilities out-of-the-box

TRUedx provides a highly secure, on-demand exchange for outsourcing all EDI-related tasks. TRUedx was designed to meet industry-specific EDI requirements out-of-the box, enabling seamless integrations to a variety of ERPs. TRUedx offers in-built support for all common communication protocols and standards, ensuring users the peace of mind that they are able to connect, move and share valuable business information with both EDI and non-EDI enabled trading partners anywhere, any time regardless of system configuration.

Connect, move and share your key business information. Trubiquity.

Trubiquity helps its customers achieve competitive advantages by delivering managed file transfer and business process integration solutions across multiple enterprise boundaries. Thousands of companies in many countries use Trubiquity enterprise and SaaS solutions to connect, move and share key business information to ensure decisions are made quickly, efficiently and correctly, while maintaining control, quality assurance and intellectual property security.
