

TRUexchange™

TRUBIQUITY

Secure managed file transfer
for extremely large files.

ARE YOU LOOKING TO:

- ▶ Save time and costs by automating manual file transfer processes?
- ▶ Collaborate with employees, customers and partners across distant geographies?
- ▶ Enable or speed the exchange of large, complex files (CAD, DMU, EPS, TIF)?
- ▶ Improve the quality of data stored across business units and organizations?
- ▶ Control and monitor the distribution of sensitive intellectual property?

Managing the potential of global data exchange.

Among the top five challenges facing businesses today are protecting intellectual property, keeping scattered work teams organized and making information available for learning and reuse. To overcome these issues, businesses are increasingly realizing the opportunity to streamline file transfer processes across product design, development and manufacturing. However, building an efficient file transfer strategy is a complex endeavor. To exchange data across internal functions, business units and partner communities, an organization faces significant investments in technology, time and skilled resources. Even after an organization begins to build a proprietary file transfer application, ongoing maintenance obligations prove costly and divert resources from core business activities.

Making truly global data exchange a reality.

TRUexchange is a highly secure, on-demand solution that supports a variety of functions with the ability to

exchange any type of data—from large engineering files to small flat file transactions—quickly and securely. Organizations can leverage TRUexchange to connect and share information with other business stakeholders in any geographic region, regardless of time zone or system configuration. TRUexchange is the managed file transfer solution for thousands of customers globally.

Enabling integration and extension through SaaS.

TRUexchange is built upon TRUcore's service oriented architecture connecting enterprises across all global communication protocols and standards. Access Trubiquity solutions via an on

demand model—over the internet, anytime, anywhere in the world. Combining the benefits of SaaS and enterprise application extension, Trubiquity integrates organizations and automates critical business processes across the global value chain.

TRUexchange™

TRUBIQUITY
